As described in our design Doc, We have two actors.
1) Anonymous user.
2) The logged in user.
The functionality for both the actors is same except logged in user can save the plagiarism report for the future.

We will try to make an attempt to highlight all options and differences in interface available to both the users.

Anonymous User

Homepage for our plagiarism checker website. Top left is left gray for to be decided website name.

Once the user chooses both file/folder to compare and if the files are appropriate, then compare button will be shown.

Report

Download Report   Start new comparision

Plagiarism reports can be downloaded by clicking on download report button at the bottom. The user has an option to download the report as PDF files or HTML files. The user can also include the files/folders to be included in the download option.

User can reset and begin another attempt to check for plagiarism using the Start new comparison button next to download report button.
